

MODEL 7265**SECURITY LIGHTING SYSTEMS**A trusted name in security since 1859SM

This Photocell is a replacement component for use in the Brinks Mercury Vapor Lamp Fixture (Model 7250) or an equivalent lighting fixture.

REPLACEMENT INSTRUCTIONS

1. BE SURE POWER IS OFF.
2. Allow the light fixture to cool down before handling photocell.
3. Remove old photocell by twisting counterclockwise to unlock the photocell. Once unlocked, unplug the photocell from the photocell socket.
4. Align the new photocell prongs with the photocell socket (it will only plug in one way).
 - a. The photocell should be firmly seated.
 - b. The North directional arrow that may be printed on the top of the photocell is only applicable for certain models of Mercury Vapor Lighting Fixtures. Please refer to the owners manual of the lighting fixture for more information.
5. Turn power ON.

Note: When power is initially turned on, the light may come on even in daylight. If this occurs, the light will turn off after two or three minutes and will automatically reactivate at dusk. If an artificial light source (e.g. automobile headlights) should accidentally activate the photocell and turn off the unit, the unit may take approximately 5 – 10 minutes to cool down before turning back on.

TROUBLESHOOTING

If a new photocell has been installed and the light fixture does not activate at dusk, check the following...

1. Power is turned ON.
2. Verify that the Lamp Bulb is not damaged or "burnt out".
3. Depending on the light fixture, it may take several minutes for the unit to activate after a power interruption. Refer to the owners manual for more specific information.

THIS PHOTOCELL IS A SEALED UNIT. DO NOT ATTEMPT TO OPEN, AS THERE ARE NO USER SERVICEABLE PARTS INSIDE. ANY ATTEMPT TO OPEN THIS UNIT WILL VOID THE WARRANTY AND MAY CAUSE PERMANENT DAMAGE TO THE UNIT.
